receipt to obtain scanned information for each receipt; and a computer in communication with the scanner, said computer executing a software which receives said scanned information for each receipt and which processes the scanned information including numerical data in the receipt to obtain said expense information from said scanned information, wherein said expense information for each receipt is categorized into one or more predetermined categories to obtain categorized information for each receipt, wherein said categorized information for each receipt is combined with categorized information for other said receipts to produce and display report information for one or more of said predetermined categories wherein the apparatus is configured to process receipts of no predefined format that include grocery receipts, purchase receipts, credit card receipts or bank statements having different widths and thicknesses.

Referring to claims 13-17, none of the references of record alone or in combination disclose or suggest an apparatus for managing financial information, comprising: a scanner for scanning various types of receipts of no predefined format, each said receipt containing expense information printed thereon; a computer in communication with said scanner, said computer receiving a scan of each said receipt, and processing said scan by collecting the expense information from the scan; and a display device in communication with said computer, wherein said computer organizes said expense information collected from each said scan by categorizing the expense information into one or more predetermined expense categories to obtain report

information, wherein said report information for at least one of said predetermined categories is displayed on said display device.
